Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The informal drawing, Fig. 3, is not of sufficient quality to permit examination. Accordingly, replacement drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to this Office action. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

Applicant is given a TWO MONTH time period to submit new drawings in compliance with 37 CFR 1.81. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a). Failure to timely submit replacement drawing sheets will result in ABANDONMENT of the application.

Claim Objections

2. Claim 1 is objected to because of the following informalities: on line 8, phrase: "means applying" should be changed to – means for applying --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Regarding claim 2, the phrase "substantially" renders the claim indefinite because it is a broad term.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee (US 2002/0146076 A1).

- a) Regarding claim 1, Lee discloses a system for communicating data between two protective relays monitoring an electric power system, comprising:

first and second communication channels (320 and 322 in Fig. 4A) extending between first and second protective relays (308 and 310 in Fig. 4A) operating power line portion of an electric power system, for communication of protection and control information between the relays;

means applying data (246, 264, 363, 332 and 334 in Fig. 4) to be transmitted from the first relay to the second relay along both first and second communication channels; and

a switch at the second relay (as shown in Fig. 4A) connecting one selected communication channel such that processed data from the connected communication channel controls outputs of the second relay, the switch being responsive to an indication that selected communication channel is faulty to switch to connecting said second communication channel, thereby minimizing any delay in continuing receive data from the first relay.

b) Regarding claim 2, Lee discloses system of claim 1, wherein the first and second communication channels are substantially identical (as shown in Fig. 4A).

c) Regarding claim 4, Lee discloses system a system of claim 1, wherein the data transmitted on both communication channels undergoes alignments filtering (324 and 326 in Fig. 4A) and logic processing (328 and 330 in Fig. 4) so that the data on both communication channels processed identically.

Allowable Subject Matter

7. Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eva Yi Zheng whose telephone number is (571) 272-3049. The examiner can normally be reached on 7:30-4:30.
